Renaissance Overview: c. 1500-1600

The revolution in art and society that began in the fifteenth century continues in the sixteenth century. This is the century that many people first think of when they think "Renaissance." Leonardo da Vinci, Michelangelo, Raphael, Titian, Dürer--these are but a few of the famous figures who forever left their mark on the shape of European art history. While the Renaissance of the fifteenth century could be organized by geography, the Renaissance of the sixteenth century becomes a bit more complex.

Mannerism in Rome and Florence

- It is difficult to neatly define Mannerism, but certain characteristics can be noted:

High Renaissance Beyond Italy

**College Board Essential Knowledge:** The 16th-century Protestant Reformation and subsequent Catholic Counter-Reformation compelled a divergence between northern and southern western European art with respect to form, function, and content

Not only are there different art styles developing in different areas of Europe, there is also the beginnings of the major religious crisis of post-Medieval Europe: *The Reformation*. The Reformation altered the map as well as the religion of Europe for all time.

**Production of religious imagery declined in northern Europe, and nonreligious genres developed and flourished in the North of Europe.**

The Protestant Reformation; KEY DATE 1517

- Throughout Church history, many dissident movements had shaken but not destroyed the Church.
- Some led to great controversy and outright war, but the unity and authority of the Church prevailed.
- That was the case until the 16th century.
- Then, against a broad backdrop of dissatisfaction with financial abuses and lavish lifestyles among the clergy, religious reformers began to challenge specific Church practices.
- Reformers were especially concerned with the selling of indulgences (forgiveness of sins and the promise of salvation) by Pope Julius II in order to raise the money to pay for the new St. Peter’s basilica.
- From their protests, these reformers came to be called Protestants and their search for church reform gave rise to a movement called the Reformation.

Renaissance in the Netherlands

- The 16th century in the Netherlands was an age of bitter religious and political turmoil.
- Despite the opposition of Charles V, who instituted book burning and the Inquisition the Protestant Reformation took hold in the northern provinces of the Netherlands (Holland).
- Seeds of unrest were sown over the course of the century, by continued religious persecution, economic hardships, and control by a distant king.
- A long battle for independence began in 1568 and ended eighty years later when Spain relinquished all claims to the region.
- However as early as 1579 the Netherlands split along religious lines into a Protestant Holland in the North and a Catholic Belgium in the South.
- Even with the turmoil, The Netherlanders found the resources to pay for the art.
